

Permit No.: WA-000190-2
Application No.: WA-000190-2

AUTHORIZATION TO DISCHARGE UNDER THE
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

In compliance with the provisions of the Federal Water Pollution Control Act, as amended, (33 U.S.C. § 1251 et. seq; the "Act"),

Department of Interior
U.S. Fish and Wildlife Service
Leavenworth National Fish Hatchery

is authorized to discharge from a facility located at Chelan County, near Leavenworth, Washington,

to receiving waters named Icicle Creek,

in accordance with effluent limitations, monitoring requirements and other conditions set forth in Part I, II and III hereof.

This permit shall become effective on January 30, 1975.

This permit and the authorization to discharge shall expire at midnight, August 31, 1979.

Signed this 30th day of December, 1974.

/s/ C. V. Smith, Jr.
Regional Administrator

This modification shall become effective on June 20, 1977.

Signed this 20th day of May, 1977.

Director, Enforcement Division

PART I

Permit No.: WA-000190-2

A. EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

1. Initial Effluent Limitations

a. During the period beginning on the effective date of this permit and lasting through June 30, 1977, the permittee is authorized to discharge in accordance with certain limitations. Such discharges shall be limited and monitored by the permittee as specified below:

EFFLUENT CHARACTERISTIC	DISCHARGE LIMITATIONS			MONITORING REQUIREMENTS	
	Daily Average	Daily Maximum	Instantaneous Maximum	Measurement Frequency	Sample Type
<u>Total Discharge</u>					
Flow m ³ /day (MGD)	N/A	N/A	N/A	Daily	Total
Suspended Solids kg/day (lbs/day)	831 (1832)	1087 (2396)	N/A	1/Month	Composite
<u>Cleaning Effluent</u>					
Settleable Solids ml/l	N/A	N/A	2.2	1/Week	Grab
<u>Non-Cleaning Effluent</u>					
Settleable Solids ml/l	N/A	N/A	0.2	2/Month	Grab

There shall be no discharge of floating solids or visible foam in other than trace amounts.

Samples taken in compliance with the monitoring requirements specified above shall be taken at the following locations: at the discharge prior to mixing with the receiving water. Grab samples for instantaneous maximums shall be taken from a single raceway.

The total discharge shall be sampled for suspended solids during representative periods of raceway cleaning in the effluent prior to discharge to the receiving water. Samples shall be collected at the minimum frequency specified above regardless of the frequency of cleaning operations.

2. Final Effluent Limitations

a. During the period beginning on July 1, 1977 and lasting through the expiration date of this permit, the permittee is authorized to discharge in accordance with certain limitations. Such discharges shall be limited and monitored by the permittee as specified below:

PART I

Page 3 of 11

Permit No.: WA-000190-2

EFFLUENT CHARACTERISTIC	DISCHARGE LIMITATIONS			MONITORING REQUIREMENTS	
	Daily Average	Daily Maximum	Instantaneous Maximum	Measurement Frequency	Sample Type
Total Discharge					
Flow m ³ /day (MGD)	N/A	N/A	N/A	Daily	Total
Suspended Solids kg/day	704	921	N/A	1/Month	Composite
(lbs/day)	(1551)	(2045)			
mg/l	N/A	N/A	15*	1/Month	Grab
Settleable Solids ml/l	0.1	N/A	N/A	2/Month	Grab

Cleaning Effluent

Suspended Solids mg/l	N/A	N/A	15*	2/Month	Grab
Settleable Solids ml/l	N/A	N/A	0.2	1/Week	Grab

*Net allowable over intake.

There shall be no discharge of floating solids or visible foam in other than trace amounts.

Samples taken in compliance with the monitoring requirements specified above shall be taken at the discharges prior to mixing with the receiving water. During periods of cleaning, the cleaning effluent shall be sampled before such effluent is combined with any other flow.

The total discharge shall be sampled for suspended solids during representative periods of raceway cleaning in the effluent prior to discharge to the receiving water. Samples shall be collected at the minimum frequency specified above regardless of the frequency of cleaning operations.

B. SCHEDULE OF COMPLIANCE

1. The permittee shall achieve compliance with the effluent limitations specified for discharges in accordance with the following schedule:

- a. Report of preliminary plan by March 31, 1975.
- b. Submit preliminary plan by April 30, 1975.

PART I

Page 4 of 11

Permit No.: WA-000190-2

- c. Report of progress July 31, 1975 and quarterly thereafter.
- d. Submit final plan by December 31, 1975.
- e. Attain compliance with final limitations by July 1, 1977.

2. No later than 14 calendar days following a date identified in the above schedule of compliance, the permittee shall submit either a report of progress or, in the case of specific actions being required by identified dates, a written notice of compliance or noncompliance. In the latter case, the notice shall include the cause of noncompliance, any remedial actions taken, and the probability of meeting the next scheduled requirement.

C. MONITORING AND REPORTING

1. Representative Sampling

Samples and measurements taken as required herein shall be representative of the volume and nature of the monitored discharge.

2. Reporting

~~Monitoring results shall be summarized each month on a Discharge Monitoring Report form (EPA 3320-1) and submitted quarterly. The three monthly summaries shall be submitted, postmarked no later than the 28th day of the month following the completed quarterly reporting period. The first quarterly reporting period shall end on March 31, 1975. Signed copies of these, and all other reports required herein, shall be submitted to the Regional Administrator at the following address:~~

United States Environmental Protection Agency
Region X
1200 Sixth Avenue
Seattle, Washington 98101

Attn: Water Compliance Evaluation Section M/S 521

3.. Definitions

a. The "daily average" discharge weight or concentration shall be determined by the addition of the measured daily discharges divided by the number of days during the calendar month when the measurements were made.

b. The "daily maximum" discharge for suspended solids means the total discharge by weight, measured by composite sampling, in any day.

c. A "composite sample" means a minimum of four (4) grab samples collected not less than two (2) hours apart during daylight hours.

When sampling two or more outfalls, each grab sample must be sized in proportion to the flow being sampled before combining with the other samples.

d. The "instantaneous maximum" means the highest concentration measured using a single grab sample from a single source.

4. Test Procedures

Test procedures for the analysis of pollutants shall conform to regulations published pursuant to Section 304(g) of the Act, under which such procedures may be required.

5. Recording of Results

For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

- a. The exact place, date, and time of sampling;
- b. The dates the analyses were performed;
- c. The person(s) who performed the analyses;
- d. The analytical techniques or methods used; and
- e. The results of all required analyses.

6. Additional Monitoring by Permittee

If the permittee monitors any pollutant at the location(s) designated herein more frequently than required by this permit, using approved analytical methods as specified above, the results of such monitoring shall be included in the calculation and reporting of the values required in the Discharge Monitoring Report form (EPA 3320-1). Such increased frequency shall also be indicated.

7. Records Retention

All records and information resulting from the monitoring activities required by this permit including all records of analyses performed and calibration and maintenance of instrumentation and recordings from continuous monitoring instrumentation shall be retained for a minimum of three (3) years, or longer if requested by the Regional Administrator.

PART II

Permit No.: WA-000190-2

A. MANAGEMENT REQUIREMENTS

1. Change in Discharge

All discharges authorized herein shall be consistent with the terms and conditions of this permit. The discharge of any pollutant identified in this permit more frequently than or at a level in excess of that authorized shall constitute a violation of the permit. Any anticipated facility expansions, production increases, or process modifications which will result in new, different, or increased discharges of pollutants must be reported by submission of a new NPDES application or, if such changes will not violate the effluent limitations specified in this permit, by notice to the permit issuing authority of such changes. Following such notice, the permit may be modified to specify and limit any pollutants not previously limited.

2. Noncompliance Notification

If, for any reason, the permittee does not comply with or will be unable to comply with any daily maximum effluent limitation specified in this permit, the permittee shall provide the Regional Administrator with the following information, in writing within five (5) days of becoming aware of such condition:

a. A description of the discharge and cause of noncompliance; and

b. The period of noncompliance, including exact dates and times; or if not corrected, the anticipated time the noncompliance is expected to continue, and steps being taken to reduce, eliminate and prevent recurrence of the noncomplying discharge.

3. Facilities Operation

The permittee shall at all times maintain in good working order and operate as efficiently as possible all treatment or control facilities or systems installed or used by the permittee to achieve compliance with the terms and conditions of this permit.

4. Adverse Impact

The permittee shall take all reasonable steps to minimize any adverse impact to navigable waters resulting from noncompliance with any effluent limitations specified in this permit, including such

accelerated or additional monitoring as necessary to determine the nature and impact of the noncomplying discharge.

5. Bypassing

Any diversion from bypass of facilities necessary to maintain compliance with the terms and conditions of this permit is prohibited, except (i) where unavoidable to prevent loss of life or severe property damage, or (ii) where excessive storm drainage or runoff would damage any facilities necessary for compliance with the effluent limitations and prohibitions of this permit. The permittee shall promptly notify the Regional Administrator in writing of each such diversion or bypass.

6. Removed Substances

Solids, sludges, filter backwash, or other pollutants removed in the course of treatment or control of wastewaters shall be disposed of in a manner such as to prevent any pollutant from such materials from entering navigable waters, except as limited in Part I-A.

7. Power Failures

In order to maintain compliance with the effluent limitations and prohibitions of this permit, the permittee shall either:

a. In accordance with the Schedule of Compliance contained in Part I, provide an alternative power source sufficient to operate the wastewater control facilities;

or, if such alternative power source is not in existence, and no date for its implementation appears in Part I,

b. Halt, reduce or otherwise control production and/or all discharges upon the reduction, loss, or failure of the primary sources of power to the wastewater control facilities.

B. RESPONSIBILITIES

1. Right of Entry

The permittee shall allow the Regional Administrator, and/or his authorized representatives, upon the presentation of credentials:

a. To enter upon the permittee's premises where an effluent source is located or in which any records are required to be kept under the terms and conditions of this permit; and

b. At reasonable times to have access to and copy any records required to be kept under the terms and conditions of this permit; to inspect any monitoring equipment or monitoring method required in this permit; and to sample any discharge of pollutants.

2. Transfer of Ownership or Control

In the event of any change in control or ownership of facilities from which the authorized discharges emanate, the permittee shall notify the succeeding owner or controller of the existence of this permit by letter, a copy of which shall be forwarded to the Regional Administrator.

3. Availability of Reports

Except for data determined to be confidential under Section 308 of the Act, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the office of the Regional Administrator. As required by the Act, effluent data shall not be considered confidential. Knowingly making a false statement on any such report may result in the imposition of criminal penalties as provided for in Section 309 of the Act.

4. Permit Modification

After notice and opportunity for a hearing, this permit may be modified, suspended, or revoked in whole or in part during its term for cause including, but not limited to, the following:

- a. Violation of any terms or conditions of this permit;
- b. Obtaining this permit by misrepresentation or failure to disclose fully all relevant facts; or
- c. A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge.

5. Toxic Pollutants

Notwithstanding Part II, B-4 above, if a toxic effluent standard or prohibition (including any schedule of compliance specified in such effluent standard or prohibition) is established under Section 307(a) of the Act for a toxic pollutant which is present in the discharge and such standard or prohibition is more stringent than any limitation for such pollutant in this permit, this permit shall be revised or modified in accordance with the toxic effluent standard or prohibition and the permittee so notified.

6. Civil and Criminal Liability

Except as provided in permit conditions on "Bypassing" (Part II, A-5) and "Power Failures" (Part II, A-7), nothing in this permit shall be construed to relieve the permittee from civil or criminal penalties for noncompliance.

7. Oil and Hazardous Substance Liability

Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under Section 311 of the Act.

8. State Laws

Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any applicable State law or regulation under authority preserved by Section 510 of the Act.

9. Property Rights

The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of Federal, State or local laws or regulations.

10. Severability

The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

PART III

OTHER REQUIREMENTS

1. Analytical Quality Control

The permittee shall submit to the Regional Administrator a summary of the analytical quality control program it proposes to use within 30 days of the effective date of this permit. Such summary shall:

a. Specify the appropriate analytical methods and quality control techniques the permittee proposes to use. The latter are to be taken from EPA publication "Handbook for Analytical Quality Control in Water and Waste Water Laboratories", June 1972;

b. Describe the sample station locations, method and frequency of collection along with the flow measuring techniques and their level of accuracy;

c. Outline the procedures to be employed in preparing analytical results for reporting purposes and subsequent storage.

2. Waterborne silt, sand, and other debris accumulating on the premises shall not be deposited back into a watercourse. After July 1, 1977, all organic solids settled out in fish culturing units shall not be resuspended and discharged with the tailwaters nor otherwise discharged to surface waters as a result of discretionary management practices without first being subjected to treatment. Such treatment shall ensure, as a minimum, conformance of the discharge from the treatment facility with the "treated effluent" limitations given in Part I, Section A.2. above.
